## I Machine name: 5XZ-8GGI gravity separator

### II Function:

It is to remove blighted seed, budding seed, damaged seed (by insect), rotten seed, deteriorated seed, moldy seed, non-viable seed, seed with black powder sick and seed with shell from grain/seed.

### III Structure:

Slope Elevator, Gravity table, grain outlet box, Frequency converter

Two motors, seven fans

Fan motor: 11KW

Vibration motors: 2.2KW

Elevator motor: 0.75kw

Side grain outlet motor: 1.1kW

Total: 15.055KW

**Voltage: 380V, 50HZ, three phases (must be three phases, voltage can be design to others)**

### IV Advantages

The wood frame is made up of beech to control hardness and deformation; Bearing is from Japan, have low noise; frame is connected by bolt without welding deformation.

### V Finished product/impurity outlet:

Web: [www.julite.com](http://www.julite.com)

Adress: Shijiazhuang Hebei China

石家庄聚力特机械有限公司

Skype: julitemachine whatsapp: +86 15930150766

First outlet: good seed/grain

Middle outlet: cycle ones (good and bad)

Third outlet: bad seed/grain

### VII Specification

Model	Sieve Surface Area (mm)	Power Kw	Capacity Kg/h	Weight Kg	Overall Size L×W×Hmm
5XZ-8	1380x3150	14.3	8000	0.85	3870×2000×1700

## Company overview

### 1 Brief introduction

Shijiazhuang Julite Machinery is specialized in researching, developing, manufacturing seed and grain processing machines. Our products includes air screen cleaner with gravity table, air screen cleaner, gravity separator, de stoner, magnetic separator, , vibration grader, weighing and packing machine, and various bucket elevator.
